Single-use party items made of **paper/cardboard (BIOBASED)**

Under the „**BIOBASED-Party**“-line, we sell products such as paper cups or paper plates that are made from PE, PP or PLA-film without a plastic coating.

This new generation of products avoids the use of plastic film coatings and, in the case of paper plates, relies on a special paper made of finely ground cellulose. For paper cups, we use a special cardboard not coated with plastic, which is made liquid-resistant with the help of a water-based dispersion.

! THE MOST IMPORTANT THING: All products in the „**BIOBASED-Party**“-line can be disposed of in the paper collection, paper bin, blue bin after use - provided they are not too dirty.

Party plates made of cardboard **without** plastic coating:

- The plates are made from FSC®-certified **fresh fiber cardboard**.
- The top is laminated with a special paper made from **finely ground cellulose - without the addition of plastic**.
- The special paper is printed with the design on the inside. **The colors are biodegradable**.
- Due to this special structure, the plates are suitable for use with all kinds of food.
- Due to their composition of **bio-based polymer-free raw materials**, the plates comply with the European guidelines (SUPD*) and are therefore not categorised as prohibited items or items whose use should be scaled back.
- The product is therefore a **mono-material** and can be recycled without any problems via **waste paper recycling**.

*The packaging film for these plates is made of bio-plastic – **BIOBASED** – and can be recycled using the dual systems.*

*Directive on the reduction of the impact of certain plastic products on the environment

BIOBASED Party

Party cups made of cardboard **without** plastic coating:

- The cups are made from FSC®-certified **fresh fiber board** and have a **water-based dispersion barrier**.
- They are printed with **food-safe and biodegradable ink**.
- The product can flow into the PCC **mono material cycle** (paper, card, cardboard) and **can be easily recycled**.

The packaging film for these cups is made of bio-plastic – **BIOBASED** - and can be recycled using the dual systems.

Napkins in **environmentally-friendly** packaging:

- Like all **PAPSTAR**-napkins, the napkins in the „**BIOBASED**-Party“-series are made from **renewable FSC®-certified cellulose**.
- All **PAPSTAR**-napkins are printed with **food-safe ink** and are **biodegradable**.

The packaging film of these napkins is **BIOBASED** and is made of wood fibres.
