DAILY Collection

Quality standards as a basic principle

From in-house production: The new DAILY Collection for “daily use”

Versatile and sustainably oriented: The assortment in the “Table top” segment is always based on the highest quality standards.

The new **DAILY Collection** is manufactured within the framework of an in-house production operation at Paper Print Converting GmbH in Austria, which is a company belonging to the **PAPSTAR** group. This ensures a certain flexibility and efficiency with regard to colour design options and fast availability of goods.

The basic prerequisite for the sustainable production of the **DAILY Collection** is an absorbent, Forest-Stewardship-Council®-certified and thus recyclable material.

Only those tissue qualities are used whose primary fibres meet all hygiene requirements.

The price of the napkins is on a par with tissue napkins with embossing along the edges, but they score with the posh and plain look, a pleasantly soft feel and better foldability.

So it almost goes without saying that when it came to assortment expansion, close attention was paid to ensure that the products in the **DAILY Collection** can be excellently combined in terms of colour with the products in the **ROYAL Collection** - for professionals from the catering trade and hotel industry, as well as for the end user.

ABOUT US

The **PAPSTAR** product range is made up of over 5000 consumables from around 200 productions in the categories disposable tableware, service packaging, table settings and household & hygiene. Besides the systematic and consequent use of renewable raw materials, the company is also devoting itself more and more to sustainable solutions in terms of cyclical material flow management.

For example, food scraps and bio-wastes of plant origin or disposable tableware and napkins made from renewable raw materials can be transformed into a new secondary raw material in a fibre-recovery treatment process. This new secondary raw material can, for example, be recycled for the production of industrial cardboard.

Europe-wide logistics and service concepts ensure the permanent supply availability of the entire product range.
