## Single-use party items made of paper/cardboard

Our party edition consists of disposable party products such as paper cups or paper plates that are made from PE, PP or PLA film without a plastic coating.

This new generation of products avoids the use of plastic film coatings and, in the case of paper plates, relies on a special paper made of finely ground cellulose. For paper cups, we use a special cardboard not coated with plastic, which is made liquid-resistant with the help of a water-based dispersion.

**! THE MOST IMPORTANT THING:** All **party edition** products can be disposed of after use in the paper collection, paper garbage can or blue bin - provided they are not too dirty.

### Party plates made of cardboard **without** plastic coating:

- The plates are made from FSC®-certified **Fresh fiber cardboard**.
- The top is laminated with a special paper made from **finely ground cellulose - without the addition of plastic**.
- The special paper is printed with the design on the inside. **The colors are biodegradable**.
- Due to this special structure, the plates are **suitable for use with all kinds of food**.
- Due to their composition of **natural polymer-free raw materials**, the plates comply with the European directives (SUPD\*) and are therefore not subject to the prohibition articles.
- The product is therefore a **mono-material** and can be recycled without any problems via **waste paper recycling**.

\* Directive on the reduction of the impact of certain plastic products on the environment

## Party cups made of cardboard **without** plastic coating:

- The cups are made from FSC®-certified **fresh fiber cardboard** and have a **water-based dispersion barrier**.
- They are printed with **food-safe** and **biodegradable ink**.
- The product can flow into the PCC **mono material cycle** (paper, card, cardboard) and **can be easily recycled**.

## Tissue napkins „party edition“:

- Like all **PAPSTAR** napkins, the **party edition** napkins are made from **renewable, FSC®-certified cellulose**.
- All **PAPSTAR** napkins are with printed with **food-safe ink** and **are biodegradable**.

PAPSTAR

## ABOUT US

The **PAPSTAR** product range is made up of over 5000 consumables from around 200 productions in the categories disposable tableware, service packaging, table settings and household & hygiene. Besides the systematic and consequent use of renewable raw materials, the company is also devoting itself more and more to sustainable solutions in terms of cyclical material flow management.

For example, food scraps and bio-wastes of plant origin or disposable tableware and napkins made from renewable raw materials can be transformed into a new secondary raw material in a fibre-recovery treatment process. This new secondary raw material can, for example, be recycled for the production of industrial cardboard.

Europe-wide logistics and service concepts ensure the permanent supply availability of the entire product range.
